

Group Challenge

Group Challenge

- In this group challenge, we will divide into small groups of approximate 2 to 3 students in each group.
- Each group will work together to solve the challenge question.
- You will spend about 30 minutes for the challenge and then each group will present their answer by screen sharing.
- The goal of this challenge is to enhance your skills in coding, research, problem solving, team collaboration and presentation.
- Proceed to GAP and download the group challenge zip file.
- Unzip and navigate to this folder in VS Code.

Group Challenge

- Here's what the end of challenge file should look like:

Group Challenge

- Your task:
 - Open challenge.html file in VS Code and preview the page on the browser.
 - It doesn't quite look like the design you just saw on the previous slide.
 - Your job is to add css codes to make it look like that finished design. Do not modify the HTML codes.
 - Return to VS Code and open the challenge.css file. First, you will notice some colors given for this challenge. You will also notice there are numerous css rules created to style the existing page content. The rules are organized into their respective page areas.
 - There are some rules already created but contain no declaration – part of your job is to fill in the necessary style declaration you see fit.
 - You should use some of the properties you'd just learned, such as *background-color*, *color*, *padding*, *margin*, *display* and others. You may refer to the demo exercise we just finished and/or online CSS resources and documentations provided.

Group Challenge

- Each group to share their solutions using share screen.
- Show your codes from VS Code.
- Presenter:
 - Explain your approach including code concepts used.
